Summary

Full-stack developer at Znorm AI (product: Snapshare), converted from intern to full-time after six months. Currently leading development of the company's internal HRMS and guiding an intern team through tickets, code reviews and releases. Works mainly with Next.js, React, TypeScript, Prisma and PostgreSQL across product UI, a full website revamp and on-site event support. MCA graduate (8.12 CGPA), published in IJSER 2025.

Experience

Znorm AI (Snapshare), Bengaluru, Hybrid Jan 2026–Present
Full Stack Developer (Jul 2026–Present); Full Stack Developer Intern (Jan–Jun 2026)

Internal HRMS (in development) ***Sep 2026–Present***

- Leading development of a multi-module HRMS covering payroll and payslips, attendance, leave, hiring, asset tracking, a sales CRM and event management.
- Implemented role-based access for 7 user roles (Super Admin, HR, Finance, Core Team, Sales, Events, Employee) with Auth.js, login throttling, password reset and an audit log.
- Built monthly pay runs with PDF payslip generation and email delivery, Excel employee import, and AES-256-GCM encryption for sensitive financial fields.
- Lead a team of interns: plan and assign tickets, review and merge pull requests, and own database schema migrations, with automated tests across 22 suites.

Stack: Next.js, React, TypeScript, Prisma, PostgreSQL (Neon), Auth.js, Tailwind CSS, Zod, Vitest, Resend, Vercel, Docker

Snapshare Product: Frontend and Event Tech Coordinator ***May–Jul 2026***

- Shipped frontend work on the Snapshare product, including UI changes, animation updates and page revamps.
- Acted as the on-site technical point of contact at client events, diagnosing and fixing product issues live and coordinating event operations end to end.
- Gathered real customer feedback at events and turned it into user-experience improvements in the product.

Znorm AI Website Revamp (znorm.org) ***Mar–May 2026***

- Revamped the company website, building new About, Training and Demo pages and the AI services section, with scroll animations and mobile and tablet layouts.
- Built product pages for EchoLink, EchoRAG, EchoSell, EchoStruct and IVA Gate, and integrated Calendly demo booking and email enquiry forms so leads reach the team directly.
- Resolved build issues and QA rounds through to launch.

Stack: Next.js, React, TypeScript, Tailwind CSS, Framer Motion, Calendly, Formspree
